PROFILE

Hi! I'm a Systems and Informatics engineer and a dedicated software developer with a strong foundation in programming, web, and mobile development. Recently, I've begun exploring data science and artificial neural networks, further broadening my technical expertise. I'm quick to pick up new languages and tools whenever needed, enjoying the challenge of adapting to evolving tech demands. With a blend of technical skills, creativity, and a knack for problem-solving, I'm ready to make a positive impact on any team. My experience with modern programming languages, frameworks, and tools allows me to contribute meaningfully to dynamic projects. Eager to apply my skills and collaborative spirit, I'm committed to continuous growth in the tech industry.

PERSONAL PROJECTS

Media Box Player 2018

Mobile application to stream multimedia files for Dropbox storage, developed in Java for Android platform.

- Project presented to get Systems Engineering Degree
- Model-View-Presenter pattern used to design Software Architecture.
- ExoPlayer Google library was used to stream data.
- Dropbox API used to connect to the account

Video Surveillance Smart System 2021

System to home video surveillance to detect fire, smoke, and human silhouette.

- Project presented to get Informatics Engineering Degree
- Camera module to capture video frames and send them to the server.
- Server receives the frames and seeks fire, smoke, and human silhouette in all frames.
- Server sends an alert through email and WhatsApp messages with a caption.
- The client can watch live stream video from the detector camera.
- Pre-trained neuronal network to identify human silhouette.
